Global Bond Cedola 06/2021, a Sub-Fund of Eurizon Opportunità

Class Unit: **RD EUR Distribution (ISIN: LU1384265564)**

This Sub-Fund is managed by Eurizon Capital S.A., a company of Intesa Sanpaolo Group

OBJECTIVES AND INVESTMENT POLICY

Objectives

The objective of this Sub-Fund is to distribute a yearly coupon while preserving capital at Maturity Date (as defined below).

No guarantee is given to investors with respect to this objective actually being reached.

The objective will be achieved through the implementation by the Investment Manager, Eurizon Capital SGR S.p.A., of active investment strategies on debt instruments and currencies with an investment horizon of about five years.

The Sub-Fund will be liquidated on 18 June 2021 ("Maturity Date").

Investment Policy

This Sub-Fund mainly invests, directly or through complex instruments (financial derivatives instruments), in debt and debt-related instruments of any kind, denominated in Euro or in other currencies, as well as in money market instruments.

Debt and debt-related instruments in which the Sub-Fund invests are mainly issued by public authorities or private companies with a high and medium quality rating ("investment grade") at time of purchase ("Issuers"), and by Italian authorities independently of any credit rating assigned to them.

Investments in debt instruments issued by Issuers with a lower quality rating ("speculative grade") do not exceed 25% of the Sub-Fund's net assets. In any case, the Sub-Fund will not be invested in extremely speculative debt instruments.

Investments in debt instruments issued by Issuers located in Emerging Countries do not exceed 35% of the Sub-Fund's net assets.

The exposure to currencies other than Euro does not exceed 35% of the Sub-Fund's net assets.

This Sub-Fund's net assets will not be invested in asset-backed securities.

The duration of the portfolio may vary over time and will generally not exceed 6 years. The duration may reach negative values in some circumstances.

On an ancillary basis, the Sub-Fund may hold any other instruments, such as but not limited to UCITS (up to 49%) and cash, including term deposits with credit institutions.

The Sub-Fund may use derivatives financial instruments aiming at hedging risks, ensuring efficient portfolio management and/or investing according to the Investment Policy. The use of derivatives financial instruments for investment purposes may amplify the up and down fluctuations of the Sub-Fund's Net Asset Value per Unit.

Redemption

You may sell your units on demand at any time. The redemption orders are executed on the basis of the first Net Asset Value per Unit calculated after the request is received in Luxembourg before the dealing deadline. The Net Asset Value per Unit is calculated weekly on Fridays.

Distribution Policy

During the first 4 years, this Class of Units will seek to distribute a yearly coupon of at least 2.30 Euro per Unit. At Maturity Date, this Class of Units will pay a coupon corresponding to the positive difference between the Net Asset Value per Unit at Maturity Date and the Initial Net Asset Value. The Management Company reserves the right, taking into account the interests of the investors, to distribute capital.

Recommendation: this Sub-Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

RISK AND REWARD PROFILE

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the sub-fund.
- The risk and reward category indicated is not guaranteed to remain unchanged and the categorisation may shift over time.
- The lowest category does not mean a risk free investment.

This Class of Unit is placed in the category 4 based on the historical annualized volatility of a model portfolio and considering the risk budget of the Sub-Fund.

This category reflects the nature of the portfolio of the Sub-Fund that may represent a combination of high and low risk investments.

Other materially relevant risks for this Sub-Fund that are not adequately captured in this synthetic indicator:

- counterparty risk: risk that a third-party with which the Sub-Fund entered into contracts in order to perform some operations may default on its obligations.
- credit risk: risk that the issuer of debt instruments fails to pay to the Sub-Fund interests and principal, even only in part.
- liquidity risk: risk that the sale of the financial instruments in which the Sub-Fund invests may be difficult depending on the features of these instruments themselves and/or on the market conditions when the sale is to be executed or on the lack of a sufficient number of potential buyers. The selling price may then be less than the value of a financial instrument.
